SUMMARY

B.Tech Computer Science (AI & ML) graduate with hands-on experience building full-stack and desktop applications using **Java, Spring Boot, React, SQLite, PostgreSQL, Docker, and Electron**. Completed a **Full Stack Development internship** delivering production-style systems with REST APIs, local persistence, and Windows installers. Strong foundation in **DSA, OOP, MVC architecture**. **Seeking entry-level Software Engineer / Backend / Full-Stack roles.**

TECHNICAL SKILLS

Languages: Java, Python
Backend: Spring Boot, REST APIs
Frontend: React, JavaScript, HTML, CSS, Bootstrap
Databases: PostgreSQL, SQLite, MySQL
Desktop & DevOps: Electron, Docker, Docker Compose, Maven
Version Control: Git, GitHub
API & Tools: Swagger/OpenAPI, Postman
Core CS: OOP, Data Structures & Algorithms, MVC
ML Tools: scikit-learn, pandas, NumPy

EDUCATION

B.Tech in Computer Science & Engineering (AI & ML)
Meghnad Saha Institute of Technology (MSIT), Kolkata | Sept 2022 – Jun 2026 | **CGPA: 7.86**

PROJECTS

E-Commerce Application (Full Stack, Dockerized): *Spring Boot 3.1.4, Java 17, React 18, PostgreSQL 15*

- Designed and developed a **full-stack e-commerce system** using Spring Boot REST APIs and a React SPA.
- Implemented **product, category, and order management** using Hibernate/JPA with PostgreSQL.
- Applied **Controller–Service–Repository architecture** with global exception handling.
- **Containerized backend and database** using Docker & Docker Compose; documented APIs using Swagger.
- GitHub: https://github.com/Nikita-929/ecommerce-app

Warehouse Management System (Desktop + Web): *Spring Boot 3.2, Java 17, React 18, SQLite, Electron*

- Built an **offline-first warehouse management desktop application** with a bundled Spring Boot backend and React UI.
- Implemented **product CRUD, Excel transaction upload, search/filter, and reporting** features.
- Used **SQLite for local persistence** and packaged the system as a **Windows installer (.exe)** using Electron.
- Added **backend health/status APIs** and robust frontend error handling with Axios interceptors.
- GitHub: https://github.com/Nikita-929/warehouse-management-desktop

EXPERIENCE

Full Stack Development Intern
ARS Technologies, Kolkata | Aug 2025 – Dec 2025
Developed and packaged an **offline warehouse management desktop application** using **Spring Boot (Java 17), React, Electron, and SQLite**, delivering **REST APIs, product management, Excel uploads, local persistence, and health/status monitoring** as a **Windows installer**.

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification – **DeepLearning.AI**

ACHIEVEMENTS & ACTIVITIES

Participant, **Smart India Hackathon 2024 |** Participant, **SAP Hackfest 2025** | Teaching school-level subjects up to **Class 10**
